P01	Miroslava Alblová	Protein Production Facility – DNA & Proteins for Your Research	p. 31
P02	Vladena Bauerová-Hlínková	The effect of the cardiac-associated mutations on the biophysical properties, fold and structure of the N-terminal domain of human ryanodine receptor 2	p. 32
P03	Gabriela Balíková Novotná	RIBOTUNER – the interplay of antibiotics, ribosomes and ABCF ATPases in fine tuning gene expression	p. 32
P04	Viktor Bartošík	Solution Structure of cAMP-dependent Protein Kinase RII α Subunit in Complex with Microtubule Associated Protein 2c	p. 33
P05	Cyril Bařínka	Inhibition of histone deacetylase 6 by 1,2, 4-oxiadiazoles: structural and biochemical characterization	p. 33
P06	Jakub Benýšek	Targeting the mRNA capping machinery of <i>Trichomonas vaginalis</i> as therapeutic approach in treatment of trichomoniasis	p. 34
P07	Jan Beránek	Monte Carlo simulations of miniprotein folding sampled with an autoencoder	p. 34
P08	Jayashri B. Bhosale	Structural insights into 14-3-3-mediated regulation of human ASK1	p. 35
P09	Tomáš Brom	Replication and transcription regulator Rta of Epstein-Barr virus - functional and structural implications for new antiviral strategy	p. 36
P10	Ondřej Bulvas	Dynamic Allosteric Regulation of Mycobacterial Inosine Monophosphate Dehydrogenase	p. 36
P11	Tereza Buráňová	Unravelling the mysteries of novel two-domain lectins from opportunistic human pathogens	p. 37
P12	Ondrej Cehlár	Structure of DC11 Fab fragment specific for the pre-aggregation conformation of IDP tau	p. 37
P13	Zuzana Cieníková	Genome anchoring, 812 retention, and release by neck proteins of <i>Staphylococcus</i> phage	p. 38
P14	Tatsiana Charnavets	Biophysical characterization of biomolecules at the Centre of molecular structure	p. 39
P15	Fanny Demay	Identification of a novel erythromycin resistance mechanism mediated by MRMA methyltransferase in <i>C. Difficile</i>	p. 39
P16	Adéla Fejfarová	Structural studies of biologically relevant protein variant of cancer-related Carbonic Anhydrase IX	p. 40
P17	Thomas Fellmeth	Influence of the Reparametrisation of the Protein-Water Interactions on the Conformation Ensemble of Tau(210-240)	p. 40
P18	Růžena Filandrová	Investigating Nucleosome Spacing as an Epigenetic Regulatory Mechanism	p. 41
P19	Zdeněk Futera	Structural, Solvent, and Temperature Effects on Protein Junction Conductance	p. 42
P20	Tibor Füzik	Asymmetric particles of TBEV provide insight into mechanisms of flavivirus assembly and maturation	p. 43
P21	Alexandra Gredová	Structural Characterization of AIRE and Its Interactions	p. 43
P22	Tomáš Greňa	Search for pathology-inducing in vitro tau filaments	p. 44
P23	Jindřich Hašek	Understanding the protein crystallization	p. 44
P24	Petra Havlíčková	When Signaling Goes Astray: Understanding MAP2K1 Mutations in Neurodevelopmental Disorders	p. 46
P25	Josef Houser	New kids on the block: Update on equipment installed at BIC Core Facility, CEITEC, Brno	p. 46

P26	A. Hrádková	Structural variability of peptide deformylase	p. 47
P27	Jakub Hrubý	Leaking Water into a TEM: Methods to Overcome Preferred Orientation in Cryo-EM	p. 48
P28	Kateřina Jirásková	Enhancing PETase Efficiency: A Unified Approach to Production and Activity Assessment	p. 49
P29	Barbora Kaščáková	Targeting 3Cpro: A Novel Strategy for Effective Enterovirus D68 Inhibition	p. 49
P30	Veronika Klápšřová	Structural characterization of the interaction between BRCA1-BARD1 and RNA polymerase II	p. 50
P31	Tomáš Koval'	Using mass photometry for sorting and selection of natively purified protein complexes	p. 51
P32	Dalibor Košek	Structural bases of "copy-out-paste-in" transposition	p. 51
P33	Aneta Kozeleková	Protein production in mammalian cells vs <i>E. coli</i> – impact on Tau protein properties	p. 52
P34	Matyas Laniček	Structural characterisation of proteins involved in the metabolism of R-loops	p. 52
P35	Stanislav Macháček	Structural Insights into Fatty Acyl Desaturases and Reductases in Insect Pheromone Biosynthesis	p. 53
P36	Katarína Martonová	Structure of tau filament core fragment dGAE with MN423 antibody	p. 53
P37	Michaela Mikysková	Discovering structural secrets of a jacalin-related lectin: a fun guy among the fungi	p. 54
P38	Lucia Motlová	Structures of the GCPII and PSMA-617 and Its Derivatives with Modified Lipophilic Linker Regions complexes	p. 55
P39	Ondřej Mixl	Role of non-canonical nucleotides in protoribosome	p. 55
P40	Jiří Pavliček	Core Facility Devoted to Crystallization of Proteins and Nucleic Acids, Centre of Molecular Structure, IBT CAS	p. 56
P41	Adam Polák	Validation of small structure motifs in disordered proteins by molecular dynamics simulations	P. 56
P42	Yelizaveta Pulnova	Laser-driven plasma X-ray source at ELI Beamlines	p. 58
P43	Mateo Seoane Blanco	PhiKZ baseplate structure	p. 58
P44	Sahra Setenay Baran	Improved validation and refinement of biomolecular structures	p. 58
P45	Martin Sitte	Functional characterisation of the luminous apparatus of the sea pen <i>Pennatula phosphorea</i>	p. 59
P46	Jan Stránský	CF Diffraction Techniques in Centre of Molecular Structure: Employing high-end X-ray technologies for laboratory structural biology	p. 60
P47	Guglielmo Tedeschi	MAVISp: A Modular Structure-Based Framework for Protein Variant Effects	p. 60
P48	Ondřej Vaněk	Crystal structure of human NK cell activation receptor NKp80	p. 61
P49	Viliam Volko	NMR structural and interactional characterization of human Tau protein	p. 62
P50	Jitka Vysloužilová	Structure and Dynamic Properties of Porphyrin Aggregates in Solution	p. 62
P51	Lisa-Maria Weinhold	A pY Reader of ARID1A Facilitates Signal-Dependent cBAF Activity	p. 63
